Notice of Allowability	Examiner	Art Unit
· .	Scott J. Sugarman	2873
The MAILING DATE of this communication appears on the cover sheet with the correspondence address All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS. This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.		
1. 🔀 This communication is responsive to <u>application filed February 2, 2004</u> .		
2. X The allowed claim(s) is/are 1-16.		
3. A The drawings filed on 02 February 2004 are accepted by the	ne Examiner.	
4.		
Attachment(s) 1. ☑ Notice of References Cited (PTO-892) 2. ☐ Notice of Draftperson's Patent Drawing Review (PTO-948) 3. ☑ Information Disclosure Statements (PTO-1449 or PTO/SB/0 Paper No./Mail Date 2-2-04 4. ☐ Examiner's Comment Regarding Requirement for Deposit of Biological Material	6. ☐ Interview Summary Paper No./Mail Dat 8), 7. ☐ Examiner's Amendn	te

DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Allowable Subject Matter

Claims 1-16 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claim 1 which include an image forming lens with only three lens components, in order from the object side, a stop, first lens component having a positive refractive power with an object side surface being convex in the central area and a convex image side surface; a second lens component having a negative refractive power with an object side surface being concave in the central area and a convex image side surface; a third lens component having a positive refractive power with an object side surface being convex in the central area and an image side surface that is concave in the central area and becomes convex at the

periphery; where all three object-side lens surfaces and all three image-side lens surfaces of the three lens components are aspheric.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sato (US 6,747,810) and Sato et al (US 6,728,047) are both cited to show other imaging lens systems having only three lens components with some similar structure and aspheric surfaces, but do not teach where all three object-side lens surfaces and all three image-side lens surfaces of the three lens components are aspheric.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott J. Sugarman whose telephone number is (571)272-2340.

The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
